## SPDT switching element

Single-pole, double throw (SPDT) has three connection : C-common, NO-normally open and NC-normally close, which allows the switching element to be electrically to the circuit NO or NC state.

## One SPDT

Pressure reach the upper or lower limit setpoint, circuit closed and opened.

## Two SPDT

Pressure reach the upper or lower limit setpoint, two circuit simultaneous closed and opened.

## Snap - action contacts

## General

Electromechanical limit switches in pointer type measuring instruments are auxiliary current switches which open or close electrical circuits at set limit values by means of a contact arm which is moved by the actual value pointer.
The snap action contact is a mechanical contact for switching capacities up to 30 W 50 VA max.
Contact making will be delayed and or advanced in relation to the movement of the actual value pointer.
To closed the circuit, the contact pin of the movable contact arm is attracted in a jump by the permanent magnet fastened to the supporting arm shortly before the set value has been reached.
Due to the retention force of the magnet, snap action contacts are more resistant against shock and vibration.
The switching safety is increased by the increased contact pressure.
When the circuit is opened, the magnet keeps the contact arm in its place until the restoring force of the measuring element exceeds the magnetic force, and the contact opens in a jump.

## Recommended contact ratings with ohmic and inductive load

| Voltage (DIN IEC 38) DC I AC | Electric contacts type pressure gauge |  |  |
| :--- | :---: | :---: | :---: |
|  | Dry gauges |  |  |
|  | DC | AC | Inductive load |
|  |  |  | $\cos \varnothing>0.7$ |
| $\mathbf{V}$ | mA | mA | mA |
| $\mathbf{2 2 0 ~ / ~ 2 3 0 ~}$ | 100 | 120 | 65 |
| $\mathbf{1 1 0 ~ / ~ 1 1 0 ~}$ | 200 | 240 | 130 |
| $\mathbf{4 8} / \mathbf{4 8}$ | 300 | 450 | 200 |
| $\mathbf{2 4}$ / 24 | 400 | 600 | 250 |

In order to ensure a high switching reliability of the contacts the switching voltage should not be below 24 V , also taking environmental influences in the long term into account.
