

High temperature service pressure gauge

Model: P740 series

Spec. sheet no. PD07-03

Service intended

P740 series have diaphragm seal to be combined with a pressure gauge, and measure the melted plastics, fiber, and synthetic under high pressure. It is suitable to be used for the situation where corrosive, contaminated, hot and viscous pressure mediums are present during the chemical or food process.

Pressure range (MPa, bar)

Refer to range table
Depending on diaphragm size and process conditions

Accuracy

±1.0% of full scale
